

PROTEAS: ENJOYING AND GROWING THEM

One of Protea Gallery's objectives is to let people know about protea flowers. Proteas do not grow everywhere, and for the United States they grow best in San Diego County. We offer cut flowers on a weekly basis and can provide 1-5 gallon pots for cultivation in your garden.

Protea make a bold impression

All flowers are locally grown and available as cut flowers and in gallon pots. You can start cultivating and appreciating these long lasting, hardy and exotic flowers. The protea are in season 10 months out of 12 and can be used for special occasions or for every day.

Protea Gallery prices are low because we go directly to the farmers and can get the latest hybrids and types rarely found in florists or nurseries.

Most cut flowers are \$3-4. Larger flowers are between \$6 – 8. For bulk orders discounts apply. 1 Gallon pots range in price from \$15 – 20. For bulk orders there are discounts

If you are interested in more information on the types of flowers that work best for growing in your neighborhood, please contact the gallery.
